

Journal of Mathematics Education

Section on East and West

- 1 Argumentation and Proving in Multicultural Classes: A Didactical Experience with Chinese and Italian Students
Benedetto Di Paola and Filippo Spagnolo
- 15 Survey and Analysis of the Statistical Reasoning among High School Students in China and Dutch
Wenfang Wang, Xiaohui Wang, and Guofang Chen

Section on Teaching and Learning

- 27 Chinese Teachers' Knowledge of Teaching Multi-digits Division
Shuhua An
- 55 Study on the Effect of Mathematics Teachers' Pedagogical Content Knowledge on Mathematics Teaching
Miao Li and Ping Yu
- 69 Lesson Study: A Potential Driving Force Behind the Innovative Use of Geometer's Sketchpad
Liew Kee Kor and Chap-Sam Lim
- 83 Evaluating the Effectiveness and Insights of Pre-Service Elementary Teachers' Abilities to Construct Word Problems for Fraction Multiplication
Fenqjen Luo
- 99 Engaging In-service Teachers in Mathematical Problem-solving Activities During Professional Development Programs
Asmamaw Yimer

Section on Mathematics Education Reform in China

- 115 Assessment of Mathematics Education in China
Rongbao Tu
- 121 Mathematics Education Reform in Mainland China in the Past Sixty Years: Reviews and Forecasts
Mingchu Xie
- 131 Concerning the New Mathematics Curriculum: The Pedagogical Content Knowledge of High School Mathematics Teachers
Lianhua Ning

Section on Equity and Minorities

- 145 A Study on the Ability of Sixth Grade Students in Tibetan Areas to Solve Math Problems
Zhongxiong Fan and Yonglin Xu
- 160 Comparison and Analysis of Math Study between students of the Tuyao and Han Ethnic Groups in Hezhou City
Zhipeng Li and Fucheng Tang
- 171 A Study of Teaching Knowledge Development of a Chinese Senior High School Math Teacher Based on One Class in Xinjiang
Honggen Tian and Jun Yang

Section on Commentary

- 180 Guiding Mathematics Instruction using Research-Based Evidence
Karen Cicmanec
